EURO *style*

BEAUTY SIMPLICITY LIGHT

The *EUROstyle* parallel sliding door is the perfect space-saving solution to access your balcony or deck.

- Takes up minimal space (5" or 125 mm) on the interior side
 - Designed to let in as much light as possible and offer you the best view to the outside with its narrow panel profiles, slightly beveled frame profiles, large glass panels, and a minimum of vertical profiles
 - Glass deeply embedded in the profile to make the insulating-glass spacer invisible
 - Large dimensions with an opening up to 13'9" (4192 mm) wide with only two panels to maximize the feeling of spaciousness and openness to the outdoors
 - A perfect match for tilt-and-turn windows and doors to give your home a consistent look
-

RELIABILITY AND ROBUSTNESS UNEQUALLED

The EUROstyle parallel sliding door incorporates the most advanced technology to deliver smooth, effortless performance year in year out.

Exceptionally easy to use, even with large and heavy mobile panels (panel weight up to 200 kg/400 lb.).

Equipped with special hardware and large durable wheels, the mobile panels are shunted slightly away from the inner side of the frame, and then effortlessly glide on a lateral rail. Likewise, closing it is child's play.

FEATURES

1. 3 ¼" (82.5 mm) deep PVC frame
2. Glass up to 2.5 mm external wall, interior wall among the thickest on the market for maximum insulation and durability
3. Multichamber structure (17 chambers in the frame, 16 in the panel) to meet the highest performance and energy efficiency standards
4. Double weatherstripping with polymer compression seals to prevent air and water leaks
5. Steel reinforcements in the most heavily used parts to provide effective strengthening for all dimensions
6. Drainage system optimized thanks to a pressure equalizer system and perfectly positioned drainage caps
7. Panel designed to be paired and perfectly compatible glass up to 1 ¾" (44.5 mm) thick
8. Hardware solidly fastened through the steel reinforcements for extra durability
9. Multipoint locking system on entire perimeter to ensure perfect soundproofing and maximum security and leak protection
10. Available aluminum sill extension

The multipoint locking system, similar to that of a tilt-and-turn window, compresses the continuous weatherstripping and seals out air, water, dust, and wind. Since it is installed on the inside and is not exposed to the elements, the hardware is exceptionally durable.
